

Borys Skip

**Quality control engineer intern
(ATQC Python)**

Phone: +380993400891

Email: boris.v.skip@gmail.com

Summary of Qualifications

I have started to learn Python for several years. I have in-class experience with programming on Python, SQL, Postgresql, Django at Python Core at SoftServe IT Academy and at Prometheus Python online platform. I have strong positive attitude and flexibility to learn new, up-to-date tools and technologies. I'm familiar with data analysis. I have fundamental knowledge and experience on both software development and software testing techniques.

I am driven and committed to enhance knowledge and skills on Test Automation with Python since 28 October at SoftServe IT Academy. I enjoy programming on Python and I want to continue to work with it.

Staying at Jagiellonian University in Crakow as a Postdoctoral fellow in international team, I have strong flexibility/adaptability, team work, networking, friendly office culture skills.

It is a honor for me to be enrolled in and deal with Test Automation with Python at SoftServe as well as work in a team.
